Multichannel amplifier AMP-1250

With this multichannel amplifier, you can control 12 (mono) or 6 (stereo) loudspeakers/zones. Designed for the 'custom install' applications, it connects perfectly to the Allegretto so you can amplify zones 5 through 8. Every amplifier has a power capacity of 50 watt (or 100 watt in bridge configuration). It may also be used as a stand-alone. You can listen to your tuner, CD player, MP3 player, etc. in different rooms and put your own spin on the sound with the localised volume control. What's also nice to know is that it will automatically turn the connected source on or off via the management circuit. And of course, this is protected (thermal protection).

Description	multichannel amplifier
Radio	-
Frequencies	20 Hz - 20 KHz
Cabinet	metal chassis
dynamic bass compensation	-
external FM/AM antennae	-
analogue tuner	-
digital tuner	-
amplifier power	12 x 50 W (bridge 100 W)
driver	-
aux-input	yes
rec-output	yes
microphone input	-
headphone connection	-
colour	silver-grey
dimensions (W x H x D)	435 x 132 x 301
weight	16 kg
battery	-
power supply	230 V
